

SALEM-Immanuel Lutheran College
Plan On Use Of Capacity Enhancement Grant (2015/2016)

Under the Voluntary Optimization of Class Structure Scheme, the number of classes in our school will be changed from 28 (in 2012-2013) to 24 (in 2016-2017). The EOEBG and other government grants will be adjusted accordingly. However, we foresee that we need a lot of funding in future years to cope with the curriculum reforms as well as the manpower mismatch problem. As a result, we need to reserve some funding for future use.

On the other hand, we have other funding (SSCSG) at the time being employ teaching assistants, administrative support staff and etc. for the objectives described above. We therefore plan not to use the CEG in 2015-2016. We will keep in view the situation and plan for the use of CEG in the coming years in due course.
